

# ASPIRO 2U FRONT ACCESS

MODEL Aspiro Front Access 2U (MS23)  
2U Integrated DC Power System  
-48VDC | 60A | 3.2kW

## INDUSTRIES & APPLICATIONS

## KEY FEATURES

- ◆ >95% Efficiency Rectifiers
- ◆ 60A / 3.2kW Load Capacity
- ◆ Full Front Access
- ◆ Remote Monitoring & Control
- ◆ Field Replaceable Controller
- ◆ Ethernet Comm. with SNMPv3
- ◆ 3 LED Alarm/Status Indicators
- ◆ 4 Form-C Relay Alarms
- ◆ 8 Load & 2 Battery Breakers
- ◆ LCD Display/Touchpad
- ◆ Easy Installation

## SAFETY COMPLIANCE

## DESCRIPTION

Aspiro 2U Front Access is a 2RU high 19" rack-mounted, integrated DC power system providing an output of -48VDC. The system can accommodate up to 4 Aspiro family high efficiency hot-swap rectifiers. A total load current of 60A / 3.2kW is available with battery charge current up to 30A in addition. The rectifiers are internally fan cooled with speed control which is a function of load and temperature, keeping acoustic noise to a minimum. The system offers full front access for cable connections with push-pull mounting brackets for either 19" or ETSI mounting.

The DC output circuits can provide up to 8 loads with breakers rated from 1A to 30A. 2 additional breakers provide battery protection. A programmable 125A low voltage battery disconnect (LVBD) is standard while an optional partial load disconnect (PLD), also rated at 125A and programmable, can provide non-critical load shedding when operating on batteries.

The ACX Advanced remote access controller monitors system parameters, controls rectifier output, and provides alarms for system failures. The Controller Module is also pluggable for easy field replacement in case of failure. There are 2 LED alarm indicators which indicate failures, (RED) Alarm and (YELLOW) Message. A third green LED indicates the controller is working properly. As standard four form-C relay outputs provide the alarms for remote use. Two digital inputs and outputs are also provided as well as a microSD card slot that accepts an up to 4GB card which is sufficient for more than 20 years data logging.

The system can be programmed by means of a remote PC web page display. Communication is by Ethernet LAN with SNMPv3 including alarm trapping. It also has provision for temperature compensated charging of an external battery using a supplied TC probe. An LCD Display/Touchpad is included for local metering, status, and setup.

The Aspiro 2U Front Access is compatible with UNIPOWER's free [PowCom™ software](#) which offers local and remote management through an advanced Windows GUI.

## SYSTEM SPECIFICATION & CAPABILITY GUIDE

SYSTEM DESIGNATION	ASPIRO 2U FRONT ACCESS - MS00023G	
<b>OUTPUT</b>		
System Voltage	-48VDC nominal   53.5V float	
Maximum Capacity @ 120VAC nominal	Load	60A

### RECTIFIER MODULES vs. SYSTEM CAPACITIES

RECTIFIER MODULES (float voltage 53.5V)						SYSTEM CAPACITY		
MODEL NUMBER	EFFICIENCY <sup>1</sup>	INPUT VOLTAGE <sup>2</sup>	INPUT CURRENT <sup>3</sup>	OUTPUT POWER	OUTPUT CURRENT	MAX. CHARGE CURRENT	MAX. LOAD CURRENT	
							TOTAL	3+1 <sup>4</sup>
XPGe12.48G	>95.0%	90-180VAC	7.3A	600W	11.2A	30.0A	44.8A	33.6A
		180-275VAC	7.0A	1200W	22.4A	30.0A	60.0A	60.0A

Notes:

1. When operating at 230VAC.
2. Operates over the full range, automatically limiting output current/power according to the actual input voltage range applied.
3. Input currents shown are expected maximums at 90VAC/180VAC as appropriate.
4. Figures quoted are at 110VAC input. See separate rectifier datasheet for details.
